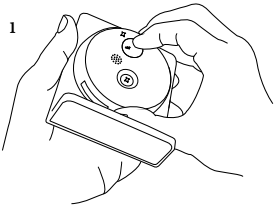
AC 01
Alarm clock

Quick Guide

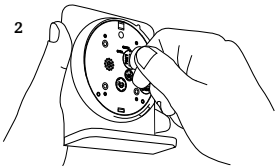
Punkt.

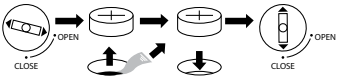
Getting started

1

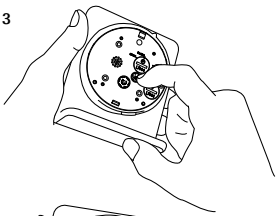


2

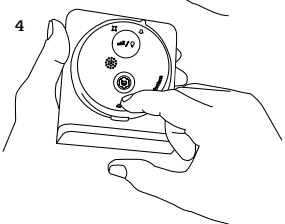




3



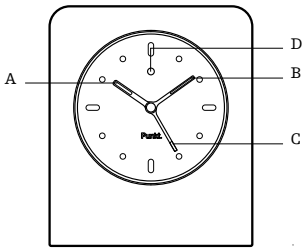
4



1 Remove the cover by pressing the key (H) which you will find in the lower part of the alarm clock back.
2 Open the three battery compartments (J and K) using a coin or a screwdriver; remove all three tabs placed under the batteries and close the compartments again.
3 Set the time by turning the appropriate knob (I).
4 Close the cover again.

Indicators and function keys

A Hour hand
B Minute hand
C Alarm hand
D Alarm status indicator (white when activated)
E Alarm status switch
F Snooze/Light key
G Alarm setting knob
H Cover opening key
I Knob to set the time
J Alarm clock battery
K Light batteries



Using the alarm clock

Presetting the alarm time
– Turn the knob (G) until the hand points to the desired time.

Turning the alarm on and off
– To activate the alarm, turn the switch (E) until the indicator is aligned on .
– When the alarm is activated, the indicator on the dial (D) shows a white circle.
– To deactivate the alarm, turn the switch (E) until the indicator is aligned on .
– When the alarm is off, the indicator (D) shows a circle of the same colour as the dial background.

Snooze function
– When the alarm rings, press the Snooze/Light key (F) to interrupt the alarm for 5 minutes.
– After 5 minutes, the alarm begins to ring again.
– The snooze function continues to work for around 40 minutes after which the alarm clock is finally turned off.

Switching the dial light on
– Press the Snooze/Light key (F) to activate the dial light.
– When the key is released, the light stays on for 2 seconds before going out.

Setting the time
– Remove the cover by pressing the key (H) which you will find in the lower part of the alarm clock back.
– Set the time by turning the appropriate knob (I).
– Close the cover again.

Batteries

Battery type
– 3 IEC LR44 batteries

Life
– The alarm clock battery has a service life of about 1 year.
– The light batteries last for 1 year on average.

Replacing the batteries
– Remove the back cover by pressing the key (H) which you will find in the lower part of the alarm clock back.
– Open the battery compartments (J and K) using a coin or a screwdriver, replace the spent batteries by new ones and close again.

Note:
The alarm and light batteries work independently; so if, for instance, the alarm battery needs to be changed, the light batteries will not necessarily have to be changed too.
